DETAILED ACTION

1. Applicant's arguments, see Amendment C (paper #9), filed 4/9/04, with respect to the rejection(s) of claim(s) 28 - 47 under Double Patenting and 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Double Patenting with regard to U.S. Pat. No. 6,678,717.
2. The Amendments after final to claims 28, 30 - 35, 38, and 40 - 43 (Amendment C; paper #9) have been entered into the present Application.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 28 - 47 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 - 26 of U.S. Patent No. 6,678,717. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present Application and U.S.

Patent No. 6,678,717 disclose a method comprising:

- receiving one or more identifiers;

- generating a search engine request to search web page content from the one or more identifiers;

- performing a web page content search in accordance with said search engine request;

- retrieving at least one search result from said web page content search;

- at least one of a parsing and generating at least one domain name from the one or more identifiers at any time after said receiving the one or more identifiers; and
- determining whether said at least one domain name is available for registration either one of a before, during, and after presenting said at least one search result from said web page content search.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
